

Automated Reddit Marketing Feature Summary

Built for planningforms.com — estate planning document platform

Account	Subreddits	Audience Groups	Operation
u/Watchdog3115	102 active	9 categories	24 / 7 automated

We built a fully automated Reddit presence that runs 24/7 without any manual input. The bot behaves like a real, knowledgeable human — it reads threads, posts genuine helpful answers about estate planning, and naturally guides people toward planningforms.com. Below is a summary of every feature that is live today.

CORE FEATURES

01

Intelligent Comment Replies

The bot finds Reddit posts where people ask about wills, trusts, probate, power of attorney, and estate planning — then posts thoughtful, helpful replies. Only replies that score 8/10 or higher on relevance and quality are posted.

*Drives trust and awareness every day,
completely hands-free.*

02

Original Post Creation

The bot creates its own Reddit threads — not just replies. Four formats: personal story, educational guide, community discussion, and actionable checklist. Each post is AI-written fresh and tailored to the specific subreddit's audience.

*Builds account authority and generates organic
thread traffic.*

03

Competitor Mention Monitoring

Every session, the bot scans all of Reddit for threads mentioning LegalZoom, Trust & Will, tomorrow.me, Willing, FreeWill, and Fabric. Complaint threads are flagged as buying-intent 9/10 and replied to first.

"LegalZoom was confusing" = someone actively looking for an alternative.

04

Thread Follow-Up Queue

After every comment posted, the bot schedules automatic revisits at 48 hours and 7 days. If the original poster replied or new questions appeared, the bot follows up — keeping your account visible as the most helpful voice.

Estate planning threads get read for months. Follow-ups compound value.

05

DM Invite CTA

On replies where buying intent is very high (score $\geq 8/10$), the bot automatically appends a soft invite: "Happy to walk through the specifics — feel free to DM me if you have more questions."

Converts public comment readers into direct 1-on-1 conversations.

06

Reddit Polls

The bot creates native Reddit polls in your top subreddits — estate planning awareness questions like "What's your biggest hesitation about estate planning?" One poll per subreddit every 30 days.

Polls get 20–40% more engagement than regular posts and surface in feeds.

07

Cross-Posting

When an original post is successful (e.g. in r/EstatePlanning), the bot automatically cross-posts it to 2–3 related subreddits with an AI-rewritten title tailored to each community. Minimum 48-hour delay between posts.

Multiplies the reach of your best content at zero extra effort.

08

AMA Preparation Tracker

The bot monitors the account's karma and age toward the threshold needed for a credible AMA thread (90 days + 2,000 karma). When the account qualifies, it auto-generates a full AMA draft ready for you to review and post.

AMAs in r/personalfinance can generate hundreds of engaged replies and direct traffic.

ACCOUNT MATURITY SYSTEM — HOW ACTIVITY SCALES SAFELY

Stage	Minimum Age	Minimum Karma	Daily Comment Cap	Promotion Style
Warmup	0 days	Any	0 (lurk only)	None
Cautious ← Active now	7 days	Any	1 per day	Helpful, topical
Steady	45 days	500	2 per day	Helpful, topical
Active	90 days	2,000	3 per day	May name the brand
Established	180 days	5,000	4 per day	Full soft-promotion

9 AUDIENCE GROUPS — 102 SUBREDDITS

Estate Planning & Legal

Small Business Owners

r/smallbusiness, r/Entrepreneur, r/selfemployed, r/freelance, r/startups, r/sweatystartup + 2 more

SAFETY & ANTI-BAN PROTECTION

Removal Rate Monitor

If Reddit starts silently removing comments, the bot automatically switches to draft-only mode for that session — protecting the account.

Randomised Session Timing

Sessions fire every 40–210 minutes at random. Occasional long breaks of 3–9 hours simulate a real human schedule.

Real Chrome Browser

Uses your actual installed Google Chrome — not a detectable headless browser — giving the account an authentic fingerprint.

Human Typing Simulation

Variable typing speed, reading pauses, and micro-breaks between actions. Every interaction looks like a real person.

Active Hours Gate

Only posts between 8am – 11pm. No activity in the early hours of the morning when no real human would be online.

Random Skip Sessions

Randomly skips some sessions entirely — just like a real person doesn't post every single day without exception.

ACCOUNT PROFILE — U/WATCHDOG3115

Display name: WatchdogPlanning

Bio: "Spent several years doing paralegal work in estate & probate. Watched too many families scramble after a loss because nothing was in order. Now I try to help people get ahead of it — wills, trusts, POA, the whole picture. Happy to answer questions. Plain English, no jargon."

Current stage: Cautious (account 10 days old) — live posting is active, 1 comment/day cap. Automatically scales up as karma and age grow — no manual changes needed.
